Whitepapers from the Xenos Electronic Content Management Center

CASE STUDY
Xenos infoWEB Enables New York's Tioga County to Automate Paper-based Processes and Cut Operating Costs.

WHITEPAPER
The New Strategic Imperative of Electronic Information Distribution
 Improve the distribution and repurposing of reports and other crucial documents.

WHITEPAPER
Turbo-charge Your ECM Systems to Meet High-volume Content Distribution

Intel's new 925X Express chipset, with support for the latest technologies including PCI Express graphics, integrated Serial ATA RAID, an 800MHz front-side bus, and fast DDR-2 memory, has launched a new crop of single-processor Pentium 4 workstations.

Dell's Precision 370 is available in either minitower or desktop form factors, with either Intel's 3.4GHz Pentium 4 Extreme Edition processor with 2MB of Level 3 cache or a 3.2GHz, 3.4GHz, or 3.6GHz Pentium 4 with 1MB of Level 2 cache and Intel's EM64T (Extended Memory 64 Technology) to work with extra-large datasets for 64-bit analysis, design, and financial modeling applications.

Starting at \$979 (currently \$783 with a limited-time discount -- Ed.), the Precision 370
