## Digital Audio Wave Launches DAWin G5000 PC Digital Audio Workstation Based on the Intel(R) Pentium(R) 4 Processor supporting Hyper-Threading Technology and Intel(R) 925X Express Chipset

Friday August 13, 11:15 am ET

HOUSTON, Aug. 13 /PRNewswire/ -- Digital Audio Wave announced all new digital audio workstations based on the Intel® Pentium® 4 Processor supporting Hyper-Threading (HT) Technology Extreme Edition 3.4 GHz\* and Intel® 925X Express Chipset. The DAWin G5000 line of Digital Audio Workstations was introduced at the Summer NAMM 2004 Show on July 25 at the Nashville Convention Center. The system was present in the Digital Audio Wave -- Yukatek ProAudio booth #231 located in Hall-1.

The ultra-quiet (18dB) DAWin G5000 digital audio workstation is a desktop system with Intel Pentium 4 Processor supporting HT Technology Extreme Edition 3.4 GHz, two 74GB Western Digital 10000RPM Raptor SATA drives powered by Intel® Matrix RAID Technology, and NVIDIA PCI Express X16 graphics card.

"Today's high-resolution audio and graphics applications demand more PC performance for professional-grade editing, recording, and sharing. Keeping pace with current and emerging usage models requires faster PCs with support for the latest industry initiatives and features. Components such as the CPU, chipset, system memory, and system buses play important roles in delivering the experience users crave. This is why Digital Audio Wave brings you the revolutionary DAWin G5000 PC Digital Audio Workstation based on the Intel Pentium 4 Processor supporting HT Technology Extreme Edition 3.4 GHz and the Intel® 925X Express Chipset," said Frank Fatih Kara, president and chief operating officer at Digital Audio Wave. "G5000 will shift the paradigm in the industry for digital music making process. Producers and musicians of all types will have an access to an ensured stability and experience an amazing execution of creativity with the reliable performance of this power house."

"The Intel-based Digital Audio Wave system is a good example of an Intel Product Dealer identifying a niche and providing the tools to meet the needs of producers, studio engineers and musicians," said Steve Dallman, director of Intel's North America Distribution and Channel Marketing. "The Intel® 925X Express chipset and the Intel Pentium 4 processor with Hyper-Threading Technology Extreme Edition provide exceptional computing power in a single platform and deliver new levels of performance for power users."

G5000 Benefits: New Technologies that enhances your overall PC DAW experience.

- PCI Express bus architecture delivers over 3.5 times more bandwidth for graphics cards than AGP8X, supporting the latest high performance graphics cards. It also offers over 3.5 times more bandwidth than PCI for I/O cards, for top-notch performance with Gigabit Ethernet devices.
